

Instructions for connecting to University of the West of Scotland's Wireless Network – MAC 10.4

Instructions for Connecting To the Wireless Network

Note : these instructions are for MAC OS X 10.4 and Safari only

1. Ensure your *Airport* card is switched on

2. Go Apple -> System Preferences

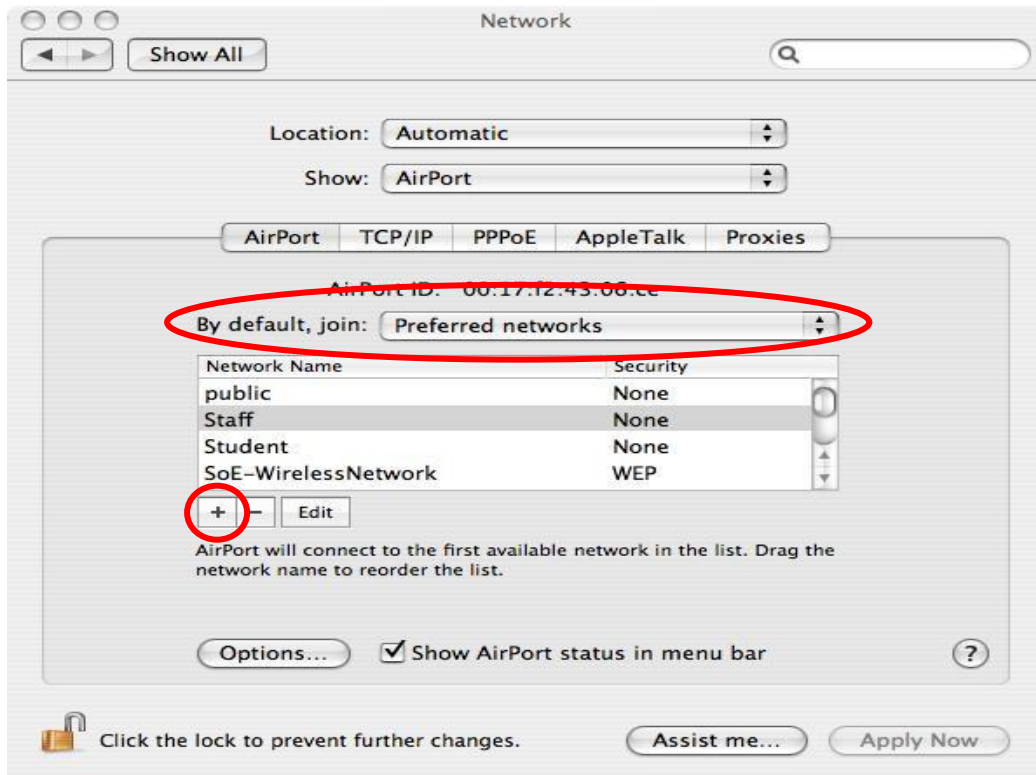

The *System Preferences* window should open

3. Click on the *Network* icon

4. Click *AirPort* – change *By Default, Join to Preferred networks* then click the +

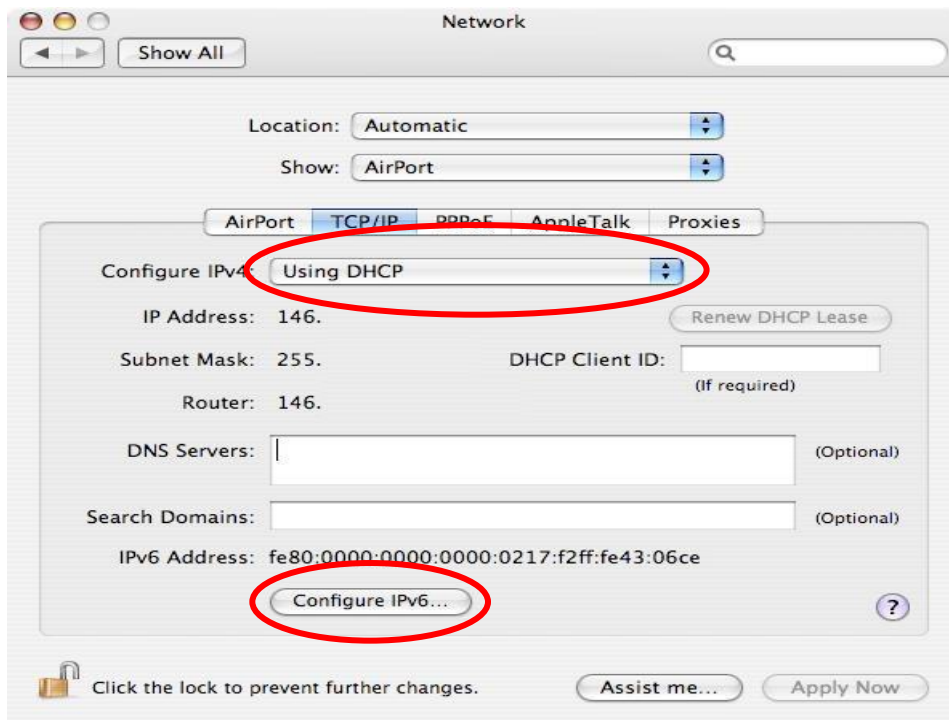

5. Type *eduroam* for the *Network Name*, choose *WPA2 Enterprise* for Security
For the *Username* and *Password* type your staff email address and password Check *Remember This Network* then click *Join*

6. Select *TCP/IP* and ensure it's set to *Using DHCP* – your MAC will try to connect to the wireless network

Once connected you will have an IP address assigned – click on *Configure IPv6* and disable this

7. The following message will appear, click *Continue* to proceed

8. Start *Safari* and browse to any site
