

## **Graduate Apprentice Trainee Software Tester**

Are you a self-motivated individual looking to use your analytical skills within a challenging career in Software Testing? Would you prefer earning whilst learning?

Edge Testing Solutions, since its launch in 2007, has sustained high levels of growth, increasing turnover year on year. Our team has a proven track record of meeting and exceeding our clients' needs. We aim to build on this by recruiting Graduate Apprentice (GA) Trainee Software Testers to embark on a fast-track programme designed to develop your skills in all aspects of software testing. Offering first class training opportunities, we look for individuals with drive and initiative, to be based primarily in our offices at Strathclyde Business Park, Bellshill.

Working with University of the West of Scotland, the successful candidate will also work towards achieving a BSc (Hons) IT Software Development degree.

Candidates will have the following attributes:

- **Year 1**
  - BBBC (102 UCAS Tariff points) at SQA Higher
  - An appropriate Foundation Apprenticeship or Modern Apprenticeship (MA)
- **Year 3**
  - A relevant MA and a minimum of 1 year's relevant work experience
  - An appropriate HND award
  - Competence in the use of basic IT software such as Microsoft Office
  - Experience in a customer facing work environment
  - Demonstrate analytical and creative capabilities
  - Have the ability to pick up new skills quickly
  - Attention to detail
  - Have a genuine interest in information technology and in particular software testing
  - Flexibility to work throughout the UK on client sites when required
  - Clean driving licence desirable

Edge Testing Solutions is a leading independent software testing provider based in the UK. With a very strong reputation as a market leading provider of software testing solutions, we are renowned for our ethos and culture of doing good business. This goes to the very heart of the organisation and doing good business for us means that we do everything to the best of our ability and the right way by our people, our clients, our suppliers, our industry and the

environment. We innovate and provide new offerings to support the requirements of our customers and to meet market trends. We have experience across many industry sectors including financial services, telecommunications and media, utilities, manufacturing and distribution, retail and the public sector.

UWS has some of the most modern GA facilities in Scotland. The IT Software Development Graduate Apprenticeship degree programme will be delivered from our Lanarkshire campus which is relocating onto the Hamilton International Technology Park (HITP) in September 2018. The new campus will offer state-of-the-art advanced learning environments, resource hub, and cutting edge specialist laboratory space alongside an existing technology park.

If you would like to work for an organisation that values you as an individual as well as a key member of a remarkable team then please send you CV and covering letter to
