

Guest Wi-Fi, named **UWS Guest** is available for visitors, and for staff and students to use with their personal devices. To connect to the UWS Guest Wi-Fi Network:

1. Click on “**UWS Guest**” from the list of available Wi-Fi networks and click on “**Connect**”.
2. Enter the Guest Wi-Fi Pre-shared key at the “**Enter the network security key**” section and click on “**Next**”. This key can be obtained from Library, Hub or IT staff.

3. If you have an existing active Guest account, log in with those details and click **Sign On**. If you are connecting for the first time or your previous Guest account has expired, click on the “**Or register for guest access**” link below the **Sign On** button.
4. Fill out the Registration form with your name and email address then click on “**Register**”.
5. You will see an Account Created screen with your login details. Click on “**Sign On**” to log in.
6. Enter your Username and the Password the system generated for you and click on “**Sign On**”.

7. Click on “**Accept**” to accept the Acceptable Use Policy.

You will be prompted to change the autogenerated password to one of your own choosing. It must be a minimum of eight characters and include a mixture of upper and lowercase as well as contain a minimum of one number.

8. At the “**Change password**” screen, enter the old password that was autogenerated by the system and then enter your new password at the “**New password**” and “**Confirm password**” sections, then click on “**Submit**”.
9. You will see a “**Welcome Message**”. To continue and connect to the UWS Guest Wi-Fi network, click on “**Continue**”.
10. A “**Success**” page will be shown to indicate that you are now connected to the UWS Guest Wi-Fi network.

Any issues should be reported to [IT Helpdesk](#).
