**Note**:   if your laptop has Norton Anti-virus software installed, it will not connect to the wireless network in the University.

- Click in the **search** box at the bottom centre of the Windows 11 start screen.

- Type in **WiFi settings**.

- Click **Open** below the WiFi Settings search result.

- On the WiFi Settings screen, select **Show available networks**.

- From the list of available networks, select **eduroam**.

- Make sure **Connect automatically** is ticked.
- Click **Connect**.

- Click **Connect** to continue connecting.

- Enter your **full UWS email address** as your username.
- Enter your **UWS network password** as your password.
- Click **OK**.

- At the security check prompt, click on **Connect** to continue connecting.

The system will now try and connect you to eduroam.

If the login details are correct, you will be successfully connected.
